

LO: To understand how early Islamic doctors used medicine.

Everybody needs a doctor every now and again. This week, I would like you to research early Islamic doctors and hospitals.

How do you think the early work of medicine has influenced modern medicine?

What do we know now that has likely developed from their studies and inventions?

There is a video you can watch that may help you look into some specifics to research. The link is on the website.

Whilst this link is aimed at KS3 children, you may find it useful to cast your eye over the medicine section.

Extra optional challenge this week:

Have a go at creating some soap at home with the help of an adult, if you have the time. I would be very impressed if you had a go at this!
