

Please begin the lesson by completing a practise test of your times tables using maths frame. See how close you can get to 25. If you are getting 25, see if you can make your time even quicker!

Lesson:

Please watch the video which clearly explains the method. Then complete the worksheet underneath. There are answers provided so you can check your work.

If you still have time, there are some convince me cards you can have a go at answering. Don't worry if you don't manage them all!

There are also some assignments on Mathletics 😊
