

First, begin the lesson by completing a simulation of the year 4 multiplication test.

<https://mathsframe.co.uk/en/resources/resource/477/Multiplication-Tables-Check>

This link should allow you to access it. You have 25 random times table questions to answer and you are given 6 seconds to answer each one. Try not to use any times tables sheets/ resources to help you, we need to be fluent by now!

Lesson:

Today we will be writing decimals in ascending and descending order.

Remember, **ascending** means increasing/ getting larger. For example: 1, 2, 3, 4, 5.

**Descending** means decreasing/ getting smaller. For example: 5, 4, 3, 2, 1.

I would like you to complete the worksheet online. You don't have to print it off if you don't want to, you can just write the answers in your book. I would like everyone to stop after completing question 7.

Challenges:

Jack - 1.23 is larger than 3.2 because it has 3 digits. True or false, explain how you know.

Queen - Question 9 on the worksheet.

Ace - Question 8 on the worksheet.

Afterwards, practise your maths skills using Mathletics and Timestables.co.uk. Have fun! Keep learning your times tables.
