

MATHS HOMEWORK

1 $7 + 15 + 9 =$

2 $130 + 70 + 70 =$

3 $90 - 44 =$

4 $5 \times 10 =$

Name: _____

Date: _____

5 $90=30+$

A grid for working out the answer to the equation $90=30+$. The grid is 20 columns wide and 10 rows high. A small rectangular box is drawn in the top row, starting from the 5th column and ending at the 10th column. A larger rectangular box is drawn in the 7th row, starting from the 15th column and ending at the 20th column.

6 $70\div 10=$

A grid for working out the answer to the equation $70\div 10=$. The grid is 20 columns wide and 10 rows high. A larger rectangular box is drawn in the 7th row, starting from the 15th column and ending at the 20th column.

7 $40\div$ $=4$

A grid for working out the answer to the equation $40\div$ $=4$. The grid is 20 columns wide and 10 rows high. A small rectangular box is drawn in the top row, starting from the 3rd column and ending at the 5th column. A larger rectangular box is drawn in the 7th row, starting from the 15th column and ending at the 20th column.

8 $45\div 5=$

A grid for working out the answer to the equation $45\div 5=$. The grid is 20 columns wide and 10 rows high. A larger rectangular box is drawn in the 7th row, starting from the 15th column and ending at the 20th column.
