

Answers:

1. You will need one pot per seed, and you are planting six seeds
2. That plants require sunlight to grow
3. Fill the pot with 50g of compost
4. Light
5. Those in the light germinated more quickly and looked more healthy/had more leaves

I: 12 days

V: Conclusively

E: It is easier to see visually how the plants grew taller

R: 300g

R: Those in the dark
