

A Cloudy Lesson

Your task today is to create a piece of instructional writing titled,

How to make a cloud

Your writing must include things you will need and the instructions to follow.

Steps to success:

- Bullet pointed list of things you will need
- Subheading introducing the instructions
- Numbered instructions
- Time adverbials to order the instructions chronologically
- Adverbs to add detail (carefully, swiftly...)

Instructions need to be clear but not so brief that a reader would struggle to complete the task without confusion.
