

1) There are **12** months in a year.

There are **24** months in two years.

There are **14** days in a fortnight.

There are **10** years in a decade.

2) **August and June** **The fourth and fifth month of the year.**

3) **2028**

4)

| Date | One Week Later |
|--------------------------------|-----------------------------------|
| 20 th March 2020 | 27th March 2020 |
| 23 rd February 2020 | 1st March 2020 |
| 30 th April 2020 | 7th May 2020 |

- 1) May is the odd one out. It is the only month in the list that has 31 days. The other months have 30 days.

2) a)

| | |
|---|-----|
| There have been ___ leap years between 2010 and 2020. | 366 |
| There are ___ days in 2020. | 5 |
| There are ___ months with less than 31 days. | 3 |

- b) There are a wide variety of sentences that will match the answer. For example:

The number of years that pass before a leap year occurs.
The number of full weeks in a month.

- 3) a) Alma – 7th May
Bernard – 13th June
Carlos – 30th April
Damien – 30th May

b)

| | | | |
|----------|--------|------|--------|
| Bernard | Damien | Alma | Carlos |
| Youngest | | | Oldest |

- 1) a) March, April and May
May, June and July
June, July and August
July, August and September
August, September and October
October, November and December

- b) April, May and June
September, October and November

- 2) Andrea is correct. 365 days is odd and 366 days is even. Therefore, a year can have an odd or even amount of days.

Britt is correct as each month has at least 28 days.

Carly is incorrect. In a leap year, there are the same amount of days (91) in January, February and March as there are in September, October and November (91).

- 3) There are a variety of questions. For example:

How many days are in 4 weeks?
How many days are in 2 fortnights?
How many days are in February when it is not a leap year?
